

# DESIGN YOUR OWN INVESTIGATION

Develop Your Question:

---

---

---

---

---

Make a Plan: Make a list below of the specific data you will need to answer the question.

Location (station name)	Water Quality Parameter	Range of Dates	Notes

Other than the data listed above, what other information (if any) will you need to answer your question?

---

---

---

Get the data: Use the website to download the data you will need.

Interpret the data: What does your data show? Be specific and descriptive.

---

---

---

---

---

---

---

---

---

---

Draw a Conclusion: What is the answer to your question? Use evidence and data to support your conclusion.
